NEW CAL

METALS INC.

CUSTOMER SERVICE FIRST

New Cal Metals builds parts — and partnerships. We're committed to earning your complete trust and satisfaction with our specialized solutions. Our exclusive one-stop design and production facility means your project will have our complete attention through every step of the manufacturing process.

DESIGN & PROTOTYPING

Our company supplies dynamic solutions for all of your precision part needs. With decades of skilled craft expertise, we use the latest, most advanced technology to design and deliver tailor-made parts that fit your project's exact technical specifications.

SALES

Our New Cal Metals sales department is an experienced team of individuals who are knowledgeable, resourceful, and solution-driven. We'll assign a dedicated sales representative to work with your company to oversee and troubleshoot any concerns throughout the manufacturing process.

DELIVERY

Our flexible production team can accommodate any demand or deadline. With our in-house manufacturing process, we guarantee complete supervision of your project from start to finish. No outsourced steps means no delays or unexpected hold-ups. We can even handle the final delivery to you.

QUALITY CRAFTSMANSHIP

New Cal Metals utilizes the highest quality materials for manufacturing customized precision parts. Our expanding inventory boasts a number of solutions that are expertly crafted and outperform and last longer than conventional mass-produced parts.
